

World's Hottest, Coldest, Wettest and Driest Places

Almost any kind of record-breaking interests a certain percentage of humanity, and some kinds interest nearly everybody. Among the latter are the record-breaking performances of weather, especially those concerning temperature and rainfall.

There is a wide range of these meteorological superlatives about which people ask questions. The answers, however, are subject to revision from year to year. Statistics of weather are a comparatively recent product; hence the extreme of bygone years are frequently surpassed. Within less than two decades the "World record" for high air-temperature was successively 127, 134 and 136 degrees F., and the highest of these figures may be exceeded any day.

The figures for the heaviest and lightest average yearly rainfall occurring in the world or in a specific country usually vary somewhat each year, even though the same places may continue to hold the blue ribbon for wetness and dryness, respectively.

Purely local records are broken somewhat every day. No item of news is more familiar than the announcement that such and such a place has had "the coldest December" or "the hottest June 10" in the history of the local weather station.

Statistics of extreme weather, besides being variable, are sometimes of doubtful accuracy. The recording instruments may have been defective, or the observer careless—or worse. At one time there was so much rivalry among weather observers in Australia to obtain high readings of their thermometers that many of their reports had to be taken with a grain of salt. For this reason science sets little store by definite figures in connection with weather extremes, while being, on the other hand, much interested in their "order of magnitude."

For both scientific and practical reasons it is highly important to know how hot the weather ever gets anywhere in the world, also to know where excessive heat is likely to occur and at what season of the year.

Generally speaking, the hottest weather on earth is not found near the equator, but prevails, during the summer season in the great desert area near the Tropics of Cancer and Capricorn. A combination of clear skies, dry air and bare soil leads to an intense heating of the ground, and the latter heats the air adjacent to it. The highest individual reading of a thermometer happens to have been made at a place 600 miles, north of the Tropic of Cancer. But it is by no means impossible that the hot weather championship will some day go to a place in the southern hemisphere, perhaps the interior of Australia.

The present highest on record—136 degrees F., at Azizia, Tripolitania has been a subject of some controversy and may yet turn out to be erroneous since this reading is several degrees higher than any recorded at the other stations in the same Italian colony, including some farther inland and more exposed to typical desert conditions.

These is much less uncertainty about the temperature of 134 registered in July, 1913, on the border of the Death Valley, 178 feet below sea level and in the midst of a large desert region that has always been notorious for excessive summer heat.

The worst spells in Death Valley occur when the intensely heated air from the highest desert drift down into the valley and there undergoes further heating by compression. This place has also the lightest known rainfall in the country, averaging only 1.45 inches a year. Both Azizia (Continued on page 8)

MATSQUI

Miss Irene Kelleher who is teaching school at Quesnell, is spending a few days as the guest of her parents Mr. and Mrs. C. Kelleher. Miss Kelleher attended the Teacher's Convention, which was held in Vancouver.

The pupils of Miss Henry's class entertained their Parents and friends at an Easter party on Wednesday afternoon.

Mr. and Mrs. McDougall entertained at a card party on Saturday evening in honor of their wedding anniversary. Prizes at the card table went to: Ladies 1st Mrs. J. Little, Gents 1st Mr. C. Kelleher. Consolations were Mr. and Mrs. F. Thompson.

Plans Progress for Trade Board Fete

Every effort is being made to make the Abbotsford and District Board of Trade annual banquet, being held in the Orange Hall on Tuesday evening of next week, a great success.

Harry Thomas, Harry Beeststone and others in charge of arrangements for the evening, have overlooked no opportunities for providing the best entertainment ever held under auspices of the Board of Trade.

A record crowd is expected, and many new faces will be seen, for lately there has been a drive for additional members. All new members will be given a complimentary ticket to the entire proceedings.

The Orange Hall has been handed over to the Board of Trade for the event, which will commence about 8 p.m.

Strong North Shore Soccer Team To Play Here Sunday

Sunday next, an Abbotsford-Chilliwack all-star soccer team will meet the well-known North Shore United squad—first-ranking team in the province, on the Jubilee grounds.

This will be an opportunity for soccer fans to see a first-class team in action here, and while the local team is sure to be outclassed "hope springs eternal" and the game is certain to be a keen, fast one. As the visitors are accustomed to play before good-sized crowds, it is hoped that enthusiasts here will make them feel at home by turning out in large numbers.

The wedding of Johnny Marlette of Chilliwack to Mary Brown of Chilliwack takes place on April 7, at Chilliwack. A reception will be held later in the day at the home of the groom's mother, Mrs. Marlette, at Peardonville.

Personal Paragraphs from In and Around Abbotsford

Sid Sayce is over from Vancouver Island for the Easter holidays.

Mrs. H. Henderson spent several days this week with friends in Chilliwack.

Mrs. Steeves of Vancouver spent Easter with her parents, Mr. and Mrs. West.

Mr. and Mrs. Alec Kask have sold their home here, and are leaving the district.

Mrs. McDonald of Vancouver spent Easter with her parents, Mr. and Mrs. T. Bailey.

Ladies B. Cribbage team lost to the men's B. Monday evening with a score of 20-16.

Richard and Allen Tretheway are home from boarding school for Easter holidays.

Mr. M. Gladwin of Vancouver visited the home of Mr. B. Gladwin a few days recently.

Mrs. W. Coutts and Mrs. D. MacCallum spent the holiday week-end in Seattle Wash.

Mr. Fred Holtsbaum met with a painful accident Sunday when he injured his knee.

W. Little local barber has purchased the Kask property and intends to occupy it shortly.

Miss Nora Bell of Vancouver visited with Mr. and Mrs. Harry Thomas over Easter holidays.

Miss Margaret McKinnon is visiting at the home of Mr. and Mrs. J. Brogan at Langley Prairie.

Mrs. R. Newcombe is visiting during Easter with her son-in-law and daughter at Michel, B. C.

Messrs Paul and Charlie Roberts have left for Nelson, B. C., where they will work in the mines.

Mr. and Mrs. Gordon Kelly of Vancouver, (nee Olive McNelly) spent Easter at home of Mr. and Mrs. McNelly.

Don McNeill and wife (nee Marjorie Sherritt) have gone to live on Vancouver Island, where Mr. McNeill has secured employment.

Mr. Hugh Thompson who has been visiting at the home of Mr. and Mrs. W. Coutts for the past week has returned to his home in Edmonton.

The Misses Vera and Flossie Hunt visited with relatives at Abbotsford Washington, at Easter. They also spent some time in Seattle and Portland.

Mr. and Mrs. L. Minaker of Sumas, Washington visited at the home of the former's sister and brother-in-law Mr. and Mrs. F. Moret over the week-end.

Shuttle Tourney Entry List Large

With 127 junior shuttlers competing for the finest aggregation of trophies ever offered for a junior contest in the province, the first annual Central Fraser Valley Junior Babbington tournament got away to a fine start in the high school auditorium on Tuesday morning.

The standard of play in the eliminations was far higher than expected, and the large number of spectators witnessed some excellent games.

The finals of the various classes take place this evening (Wednesday) commencing at 7 p. m. and it is expected that there will be a large turnout to witness the last game and the presentation of prizes.

Mrs. F. Rudge entertained with 3 tables of bridge on Monday evening.

Miss Frances Benedict of Vancouver visited her home here over the week-end.

The Thursday afternoon Bridge Club met at the home of Mrs. Plaxton last week.

Mr. Howard Little and Mr. Olson of Port Alberni visited at the home of the former's mother Mrs. W. Little over the week-end.

Several Abbotsford young people attended a party Monday night in honor of Allan Hartley, who has just returned from England.

Mr. Hartley is visiting friends in Abbotsford before returning to his home in Kelowna.

Mrs. William Turner entertained at a bridge on March 23, at her home, when five tables were at play. First prize went to Mrs. Newcombe.

Consolation was awarded Mrs. E. A. Barrett. Proceedings, which will be given to the M.-S.-A. Welfare Fund, were eight dollars.

Ernest Mann, formerly of Abbotsford, has relinquished operation of the M. & T. Logging Company, and assets of the company have been taken over by the Vedder River Logging Co. The outfit, which logged at Harrison Lake, employed a number of local loggers, but closed down in Dec. It is expected that operations will be resumed in the very near future.

Tobacco Acreage Increased on Sumas

Tobacco growers on Sumas Prairie have almost completed their seeding, and there promises to be a much greater increase in the acreage to be raised this year. The Spencer Tobacco Farm under supervision of Mr. J. McVittie, is increasing its acreage from 30 last year to 75 this season; O. Melike plans to raise a larger crop and will in all probability erect three or four kilns.

The B. C. Sumas Tobacco Growers' Co-operation, under management of Mr. Walters, also reports that members will grow more tobacco this year. Hungarian growers have rented a number of the McKercher kilns, in anticipation of a successful year.

GIFFORD

Mrs. Whitson entertained the Sunday school-children at her home on Monday afternoon.

Myrtle Ellerson suffered a painful accident last week when she accidentally sprained her ankle.

Mrs. A. Whitson entertained at an Easter party on Monday afternoon for a group of Sunday school children.

Mrs. R. Johnstone has returned from Vancouver where she has been spending a few days as the guests of her sister.

Mrs. W. Thompson entertained at a children's party on Friday afternoon in honor of the 10th birthday anniversary of her daughter Jeannie.

A farewell party was held by a number last Thursday evening in the agricultural hall, in honor of Mr. and Mrs. J. Black. Mr. and Mrs. Black are leaving next week to reside in Scotland.

An enjoyable time was spent on Thursday evening when a number of friends, held a party in the Agricultural hall in honor of Mr. and Mrs. Black who are leaving on Sunday for Montreal enroute for their old home in Scotland.

BRADNER

Miss Ivy Sherritt has gone to Vancouver to reside.

Mr. and Mrs. M. Krumpetch and family are moving to Burnaby, pretty gifts.

Mr. and Mrs. W. Chittenden and daughter visited friends and relatives here last week-end.

Mr. C. W. T. Griffith is suffering in the M. S. A. hospital from a painful injury to his hand, which he received while chopping wood.

The Matsqui girls' basketball team met the Bradner girls on Wednesday evening, with the home team winning with a score of 21 to 20.

Mr. J. A. Carmichael was appointed local advisory school trustee to Dr. W. Plenderleith, the official government trustee in charge of the Abbotsford, Matsqui and Sumas School district at a public meeting held in the school on Monday evening.

The annual business meeting and election of officers of the Presbyterian church was held on March 18. The financial report showed a satisfactory year. The following officers were elected: Board of directors chairman, Mr. R. R. Donaldson; secretary-treasurer Mr. J. A. Carmichael, directors, Mr. D. Heaslop, Mr. M. McMath and Mr. F. T. Sloggett, Sr.

A number of neighbors and friends gathered at the home of Mr. and Mrs. Charles Ferris to give them a "home warming." During the evening cards and games were played. "Cootie" prizes were awarded to Mrs. Solomon and Mr. W. Denny and consolations going to Mrs. Farris and Mrs. N. M. Peterson. Mrs. W. Towlan served refreshments and was assisted by Miss Farris.

Matsqui District Library Council Elects Officers

At the annual meeting and election of officers of the Matsqui District Library Council which was held in the Glenmore school on Thursday evening, Mrs. Frank Thompson was unanimously re-elected president. Delegates from Poplar, Peardonville, Clayburn, Matsqui, Pine Grove, and Gifford presented reports.

Mrs. T. D. Smith representing the Poplar District reported a very active membership of two-hundred and fifty registered readers.

Considerable increase in the juvenile membership was reported by Mrs. McInroy, the Peardonville delegate.

Enthusiasm shown by the school teachers in helping the pupils to select and later review their reading matter has created an active interest in the library.

Mr. Myhre reported improvements had been made in the custodial service at the Matsqui, deposit station, and books at the station were now well kept.

Pine Grove readers as reported by Miss F. Frey, have shown a decided preference for non-fiction, during the winter months, when the circulation almost doubles that of the summer.

Mr. Trimmell reported the interest in the library 'stop' in the Village, Gifford reported a study group active during the Fall and Winter months. The library committee has also sponsored a program of social activities during the winter months. A slight increase in circulation has also been noted.

Mr. C. K. Morison gave a brief resume of the year's activities of the travelling library, reporting several new 'stops' have been inaugurated recently, while it was hoped to further enhance library facilities in the near future.

BREAD BAKING

Is not a gainful occupation to be done at home

Pretty women cannot hope to long retain their beauty and health if they are compelled to stand over hot ovens baking bread.

No money can be saved by their doing so, either, and it's hard work. Abbotsford Bakery Bread is equal to the best you make at home—just like your mother used to bake, and it can be had fresh every day. Do not tsart home baking—it doesn't pay.

When ordering from your Grocery, be sure to ask for Abbotsford Bakery Bread. Take no substitute. If your grocery can't supply, order from the Bakery or from one of our drivers.

The Abbotsford Bakery

Two Important Reasons

Why it is wise to build or make alterations at this time

The Government, through the banks, has made it possible for property owners to obtain financial assistance along the lines of the Government-Sponsored Home Building and Home Improvement plans.

Another thing to bear in mind is that during the past months there has been a sharp increase in the price of most commodities. Lumber prices may advance. So it would be the part of wisdom to buy your lumber and other building requirements without further delay.

We can supply everything you need in this line.

"How do you keep your outhouse clean?"
"I use GILLETT'S LYE regularly... It keeps things clean and sanitary"

Outside closets kept clean this easy way!

THERE'S no risk of offensive outhouse odors when you use Gillett's Pure Flake Lye regularly. Just sprinkle half a tin over contents of closet—once a week. There's no need to remove contents—Gillett's does it for you.

Gillett's Lye in the household saves hours of heavy work—clears clogged drains, scours dirty pots and pans, quickly flushes away ugly toilet stains. Keep a tin handy.

FREE BOOKLET—The Gillett's Lye Booklet tells how to use this powerful cleanser for dozens of tasks. Send for a free copy to Standard Brands Ltd., Fraser Ave. and Liberty St., Toronto, Ont.

Never dissolve lye in hot water. The action of the lye itself heats the water.

WORLD HAPPENINGS BRIEFLY TOLD

A special attraction in London during coronation time will be an exhibition of the intimate possessions of royalty in Europe during the last 400 years.

James Dawson, 80, one of the original members of the Royal North West Mounted Police, died in hospital at Red Deer. He was born in Toronto.

The house where Edgar Allen Poe is said to have written "The Gold Bug" and "The Raven", was sold for \$7,000 at sheriff's sale to Richard Gimbel for presentation to Philadelphia as a memorial.

Lieutenant-Commander Donald B. MacMillan, noted explorer, announced he would leave Boston June 19 on his 16th Arctic expedition with a party of about 30 scientists and college students.

King George VI. will hold a levee at Holyrood Castle, Scotland, July 8. He will receive officers of the army, navy and air force stationed in Scotland, high officials, members of parliament and leading Scottish citizens.

Detroit weather bureau officials checked records and reported ice conditions on the Great Lakes this winter were easiest since the bureau began in 1892. Commercial fishing has been almost uninterrupted for the first winter on record.

Word reached London that a trio of British motorists, including H. E. Symons, completed a 2,000-mile trip across the Sahara desert from Algiers to Kano, in Nigeria, believed the first successful crossing of the Sahara by a luxury car (Rolls Royce).

The British government is aware of several cases of sabotage in armament factories working on government orders and "appropriate action will be taken by the appropriate authorities," Geoffrey Lloyd, under-secretary of state for home affairs, informed the House of Commons.

Violin strings are made from sheep gut and the strings on the bows from horsehair, while the wood of the bows come from Brazil.

For \$32, a tourist can have the Acropolis, in Athens, privately illuminated by great floodlights for two hours on any night.

Russia's iron output is lagging behind demand. 2193

HOW TO OVERCOME ITCHING PILES

If you are annoyed with itching piles or rectal soreness, do not neglect the same or run the risk of an operation. Any itching, soreness or painful passage of stool, is nature's warning and proper treatment should be secured at once. For this purpose get from any druggist, a package of Hemroid and use as directed. This formula, which is used internally, quickly relieves the itching and soreness and aids in healing the sore, tender spots. Hemroid is a physician's prescription and is highly recommended. It is easy to use and it means the height of folly for anyone to risk an operation when a simple remedy, which is so pleasant to use may be had at such a reasonable cost.

Message From Chief Scout

Service Is Recipe For Happy Life Says Lord Baden-Powell

The national office of the Boy Scouts of America, 2 Park Avenue, New York, made public a message it had received from Lord Baden-Powell, founder of the Boy Scout movement who recently celebrated his 80th birthday.

Lord Baden-Powell, who is the "chief Scout of the world," told the more than 2,000,000 Scouts in the world of the active life he has led, of the happiness he has obtained from being of service to others, and added:

"Eighty years may seem to you a long time but I can't remember a time when I wasn't busy, and as long as you are busy you can't help being cheerful. If ever you find yourself without something to do, remember there are always lots of people wanting help, old people or infirm and poor people, who would be only too glad of a helping hand.

"However poor or small you may be, you can always find some one worse off than yourself, ill or old or crippled. If you go and help them and cheer them up a funny thing happens. You find that by making others happy you are making yourself all the happier, too.

"I want you to have as long and jolly a life as I have had. You can get it if you keep yourself healthy and helpful to others. I will tell you my secret for this:

"I have always tried to carry out the Scout promise and the Scout law in all that I do. If you do that, you will make a success of your life and will have a very happy time, even if you live to 80."

Very Few Orators Now

Speakers Of To-Day Are Lacking In Eloquence

Years ago platform speakers abounded, and their orations were listened to by many thousands. There were great preachers also in those days, and while men went to church to be thrilled with divine eloquence, that was better than not going at all. Oratory is not so noticeable today. The Lauriers, the Osiers, and the Blackstocks of the law are seldom heard now because their counterparts do not exist. Men travelled long distances in their day to hear them present cases to juries. Few bother to-day, because the eloquence for which they were famous died with their passing.—Guelph Mercury.

In Switzerland, Swiss cheese is generally marketed in large, bulging wheels of 100 to 200 pounds.

Russia is teaching scientific mining to thousands of mine workers.

HE DARE NOT MOVE IN BED

Nights Were Torture Through Lumbago

Only those who have suffered from lumbago know how exceedingly painful it can be. And when they discover a remedy for this complaint, they are anxious to pass on the good news to other sufferers. Let this man tell you how Kruschen brought him relief.

"I had a bad attack of lumbago. When I got into bed I had to stay in that position—I could not move for pain. I didn't know what to take or what to do. I was advised to try Kruschen Salts and I am very grateful I did so. After taking a few doses I felt relief, and after taking one large bottle, I am glad to say that my lumbago had entirely gone, and I have not had the slightest trace of it coming back."—G.A.V.

Kruschen is a combination of numerous mineral salts which assist in stimulating your liver and kidneys to healthy, regular activity. They ensure internal cleanliness, and so help to keep the bloodstream pure.

Governor-General's Tour

Will Go North This Summer Through The Barren Lands And Mackenzie River Valley

Governor-General Lord Tweedsmuir is heading north this summer, through the Barren Lands and up the Mackenzie river valley to Akklavik on the rim of the Arctic Circle, and part of his tour through the northwest will be made by aeroplane.

The vice-regal party will be in Calgary for the stamped July 9 and 10. From there His Excellency will likely go for a week to the vicinity of Red Deer and Rocky Mountain House.

On July 21 Lord Tweedsmuir will leave Waterways for Akklavik by boat arriving there about Aug. 6. Then he intends to fly to Herschel Island, 100 miles north of Akklavik, and he will return to Edmonton by air.

From Edmonton, His Excellency will go to Burns Lake and trek through the Tweedsmuir National park to Bella Coola, B.C. It is likely he will take a steamer from Bella Coola to Prince Rupert and return to Eastern Canada from there, arriving in Ottawa the first week in September.

'Planes Banned For Day

No aeroplane will be permitted to fly over London on Coronation Day, May 12, the air ministry warned aviators. The ban will be in effect for 24 hours, from midnight May 11 to midnight May 12. Flights will be prohibited within a radius of five miles from Buckingham Palace.

Gardening

The main object of pruning, whether it be rose bushes, fruit trees or flowering shrubs, is to open up the centre of the growth so that sunshine and air may penetrate freely and also, of course, to produce a symmetrical plant. Naturally any dead or weak growth should be removed and also branches that rub against each other.

Early March until late in June is usually considered the best time for this sort of work but there are a few specific exceptions. Most of these are the early blooming shrubs, such as the Forsythia. These should be left until after blooming. Grapes must be pruned early in March to avoid excessive bleeding. Raspberries are pruned after the crop has been produced and then all the year-old canes should be removed, leaving only the new shoots.

The best arrangement for starting seed indoors is a hot-bed, though where only a few plants of each variety are required a shallow box in a sunny window will be sufficient. A hot-bed simply consists of an old window sash laid on a wooden framework about 18 inches high, which contains two inches of fine garden soil on a layer of fresh, slightly strawy, horse manure or some other heat-providing material. In an open place and facing the South dig a pit of the same dimensions as the window-frame and about a foot deep. Into this put the manure. (If frost prevents digging, simply pile on top of the ground). The layer of manure should be about 18 inches thick when well pressed down. It is held in place by the sides of the pit and the frame. On top is placed two inches of light garden soil, preferably mixed with a little sand. The window is fitted snugly into place on top and should be about nine inches above the soil at the front and 15 inches at the back to allow rain to run off and also to catch the full rays of the sun. At the first the soil will heat rapidly, but in about three days it will have cooled to around 80 degrees which is the proper temperature.

The seed is planted in rows about two inches apart, and the bed watered frequently. On warm days it will be necessary to ventilate by raising the window frame an inch or so. When the second set of leaves develop, thin. About three weeks before going outside, the seedlings are transplanted to a cold frame, which is the same as a hot-bed only without the heating manure. Here they are hardened thoroughly before being set out in their permanent quarters. When started in the house the procedure is practically the same, only of course, no heating material is needed. Boxes about three inches deep are filled with a mixture of sand and light soil and placed in a bright window where, preferably, there is a double glass to prevent cold draughts at night.

Check On Pilots

United States To Experiment With Airline Safety Device

United States air commerce bureau officials reported they soon will begin experiments with one of the newest airline safety devices—a "mechanical eye" which will secretly record how pilots handle their planes.

The instrument, known as an "air log" is a cylindrical, metal inclosed gadget fitted into planes to record speed, direction, altitude and other data during flight.

By studying the record, officials said, airline supervisors can tell much about how efficiently the pilot operated his plane and whether he observed all safety regulations and instructions.

The vilest - smelling compound known to man is mercaptan.

Forty-Shilling Day Observed In Churchyard At Surrey, England

Candlemas Day was the occasion of a curious ceremony in the churchyard at Wotton, Surrey, England. Under the will of William Granville, who died over two centuries ago, eight boys of the district stood by his tomb, with one hand upon it, and repeated from memory the Ten Commandments, the Lord's Prayer and the Apostles' Creed. Those who made the citation without mistake each received £2. The anniversary, says the News of the World, is known as Forty-Shilling Day.

Air mail postage in Britain is to be reduced to three cents a half ounce.

Shanghai, China, will inspect tea to improve export quality.

BIG CORONATION NEEDLEWORK PATTERN PRESENTS SPECIAL PATRIOTIC APPEAL

Pattern 2000

With the coming of the Coronation, what fun it will be to have special souvenir coronation designs to work on pillow slips, cushions, bath towels, scarves. Our needlecraft department has produced these designs especially to delight all needlework folk. Little birthday gifts and remembrances this year will be especially timely if these designs are worked on them.

The large emblem in cross-stitch or outline stitch will make a handsome pillow-top, or would be striking framed as a picture. Westminster Abbey, a needlework "etching", done

in a single thread of brown or black, is mainly single or running stitch. It is the sort of picture that is quickly done. The four shields of the British Isles as well as the flowers that are their emblems, are of course, to be done in color. These shields, or flowers, would be ever so effective on scarves, cloths and pillows.

The transfer pattern contains one cross-stitch motif 10½ x 11½ inches; one picture of Westminster Abbey 5½ x 8 inches; four shields each measuring 4½ x 5 inches, and six floral motifs averaging 3 x 3½ inches; material requirements; suggestions for placing motifs on a

variety of articles; color suggestions; illustration of all stitches used.

There you have it. The sort of needlework you will enjoy and your friends will praise. Why not sit right down and order your complete transfer pattern with all instructions, today. In Pattern 2000 the instructions are so complete and easy to follow that even if you are just starting your needlework you will have no difficulty.

To obtain this pattern send 20 cents in stamps or coin (coin preferred) to Household Arts Dept., Winnipeg Newspaper Union, 175 McDermot Ave. E., Winnipeg.

A REVOLUTION IN THE KITCHEN

Presto-Pack is a new and revolutionary way of handling Household Waxed Tissue. 45 sheets packed in an envelope which you hang on the wall. Then as you require it, just draw out a sheet at a time. You can't draw more. That's the beauty of it.

Try Presto-Pack today. You'll find it the handiest thing in the kitchen.

SORE THROAT?

Quick!

Gargle with "ASPIRIN"

For the most amazing relief from sore throat due to colds, do this: Crush and dissolve three "Aspirin" tablets in 1/2 glass of water. Then gargle with this, holding the head well back. This puts the soothing analgesic medicine of "Aspirin" in direct contact with the sore, inflamed membranes of your throat. Thus rawness and pain are eased almost instantly and you have wonderful comfort. You'll say it's the most marvelous way to relieve a sore throat you ever found. And your doctor, we are sure, will approve it.

• "Aspirin" tablets are made in Canada by the Bayer Company, Limited, of Windsor, Ontario.

ASPIRIN

THE YELLOW BRIAR

A Story of the Irish, on the Canadian Countryside
By PATRICK SLATER
By arrangement with Thomas Allen, Publisher, Toronto.

CHAPTER I.

Out in the Ontario countryside, the late spring is a pleasing and soul-mellowing season of the year. It commences once the seeding is done; and lasts until the chattering mower starts to mishandle its pitman shaft. In those sweet-smelling, warm, soft, juicy days of early June, the fields everywhere are bursting with fresh young life. After the dry fodder of a long winter, the cattle have had time to purge their bowels with the rich, lush grasses; and their skins have been softened, and the dirty warties on their flanks have been loosened by the warm spring rains. The air is as soaked with delicious hope as the meadows with the dew.

It is for such an inviting scene that the silent and wary thrush descends the South; and it is the rapture of it filling his breast that turns him into the saucy and intimately friendly robin who insists on nesting in the most obvious places about my kitchen stoop. Plain for me to understand, he tells me the time is now at hand to "Cheer up! D'ye hear? Let joy be unconfined!"

Perhaps you think the mellow tones of the late autumn should make a stronger appeal to an old fellow like me. Faith no! Sure an Irish heart is always youthful. Before we grow old, we live in hope of things here; when we are grown old, we live in hope of things hereafter. The weight of years that burden the flesh presses lightly on the spirit of an old Irishman.

In this northern clime, harvest-time has always seemed to me a serene and gloomy season. I have seldom seen men come rejoicing, bringing in the sheaves—and never in a barley harvest. The nights commence settling down early, and come upon us with an abrupt suddenness. The air bites a bit in the early mornings;

WHEN HE LOOKS IN YOUR EYES!

Do they flash and sparkle; or does he find them dull and unattractive? If your eyes are dull or have a yellow tinge, it's probably because your liver isn't functioning properly. Your liver affects almost every part of your body and if it gets out of kilter you can't look well, you can't be well. So keep your liver healthy by taking Fruit-a-tives. This famous remedy contains extracts of fruits and herbs and acts to stimulate the liver to normal healthy action; activates the flow of bile, cleanses the elimination tract, and helps 4 other vital organs of the body. Do not let your liver affect your looks. Start taking Fruit-a-tives today. Your druggist has them. Cost is low, only 25c; 50c. And insist on genuine "Fruit-a-tives".

and, here and there, the furtive rime marks the midnight prowling of the frost king, who already plans to reassert his sovereign rights. If the crops have been poor, the scanty contents of the barns distress us; and if Nature has been over bountiful, the prices offered are more distressing still. The farmer's is a gambler's job. Old Mother Earth rolls the bones for him. In the spring, he has laid his wager, and his hope hangs high.

It is pleasant to watch the young gambol on the hillside pastures and punch the swollen udders of their dams. It is sweet to smell the pungent, homely earth in its creative mood. It is refreshing to feel the mild sunshine strike down, casual-like, filtering through a screen of opalescent emerald. This is the season for loafing a bit about an Ontario farm; and, in the afternoon that now concerns us, I beg to advise that, as for me and my household, we were busy loafing. The hired man was going through the slow motions of mending the orchard fence. His stomach must have stood the cooking we were getting better than mine; because he was whistling some tune about the murmur of a waterfall. I had been down to the lower hundred salting the young cattle. They looked to be doing fine.

About the old lawn and in the fence corners, the stinking burdocks were sticking their miserable snouts up in the air—and looking healthy. It is a caution the things that require fixing about a farm; and continue requiring it. I got the axe from the woodshed, and set about sinking its sharp blade well below the crowns of those burdocks with a view to destroying them utterly and in orderly detail. I have carried on a personal warfare against them on this farm, on and off, for over seventy years. Making rhymes was everyone's foible at times in the early days; and a red-headed hired boy once cracked a good one at my expense:

On Mono's hills, the farmer grubs along,
And, like the Indian, chants a dismal song.
On rainy days, out you see him stalk
To tomahawk the healthy young burdock.

That young man's Christian name was Wendell—we called him Pepper-top for short. He was discharged before his time was up—not because of the poetry, but because of grey cooties. He went into the milling business, and in after years became a director of a charter bank.

Several times after absences of years, I have returned to reduce to complete subjection the burdocks on this farm. And it was all to do again. But, lately and right under my nose, they seem to be getting a little ahead of the old man. And this struck me as pitiable in a way. After my battles against her weeds and grasses crowding in upon me, Nature seemed to say: "Ah, ah, old thing! We've got you on the run at last." Even the fields—my beautiful grain fields—have become mere hay and pasture lands; and I have fallen to the low estate of a lean-necked, grass-land farmer. Father in Heaven, what have I done to deserve this? The soil of this farm has been a life-long sweetheart of mine; and the glint of a plowshare polished with use once helped me in my courting.

Scalping burdocks is a good job for an old man—if he will stick at it. All it requires is patience; and there is plenty of time for thinking. What a job it was, thought I, for a seedy old bachelor like me to get an orderly woman to stick at housekeeping on a farm. How could it be otherwise—so cold and drafty in the winter time? Now here was the widow Wilkie. I did not like her sloppy porridge, or her sniffing ways. But she put up with my dog in the kitchen; so I put up with her on the farm. Well, anyway, I was master of a home of my own—such as it was—which was more than many the father of a large family could ever boast.

I glanced over my shoulder. Unbeknownst to me, a long, slim, low-hung car had come up the lane and was making a silent stop within a few feet of where I was kneeling. A colored man in chocolate uniform sat at the wheel. There was a detached air of well-groomed luxury about the vehicle. Now I know quite a bit about motor cars myself. I was the first person in this district to own one. I bought a touring car, brand new; and on Sunday for years, when the roads were in good condition, I drove it regularly to Mass. At other times, I hitched up the buggy. I do not drive my car now; but I have it in the barn, jacked up to save the tires. The copper on the radiator is as bright as it ever was, and there is not a scratch anywhere to be seen. And then, for years, there has been an orgy of car buying among the neighboring farmers, who have been busy motoring themselves out of the well-to-do class.

But compared with the cars hereabouts, the motor with the saffron driver was a buxom queen bee to a humble little worker.

"Jimmie crickets!" said I to myself. "Some class!"

I felt a stiffening in my joints in the rising. Then I walked over toward the tipsy old picket-fence.

His nibs in the leggings hopped around to open the door, and out of the paunch of the vehicle stepped a young woman who fluttered over toward me. Not that I could say she was a young person, right off, at first. The way women dress nowadays, it is next to impossible to tell, offhand, how old they are—unless they are over forty.

"Are you Mr. Patrick Slater?" she enquired; and her voice was low and pleasing.

I dislike a woman who uses her nose as a sounding board.

"Yes," I said. "I am old Paddy Slater."

Then I found myself chatting with a very lovely young girl whose blue-grey eyes were soft and friendly. She stood as straight as a whip; and she looked me square in the face. I had seen those eyes many a time before. Her mouth was pleasant and sweet. Her clothes every day would be the same as Sunday, with the neatness of the pretty girl—so comely and smiling.

I do not mention her name; because, as they say in the army: "No names, no pack drill." My young friend may happen to read this, and she might not like it.

(To Be Continued)

Another Ape-Man

Skull Of Prehistoric Ape-Man Found In South Africa

The skull of another prehistoric ape-man, believed to be between 50,000 and 100,000 years old, has been discovered by Mr. G. Barlow in the Krugfontein Caves, five miles from Sterksburg, in the Transvaal.

Mr. Barlow was blasting near the entrance to the caves at the spot where Dr. Robert Broom, of the Transvaal Museum, found the skull of a prehistoric woman, a near relation of the Taungs ape, which he christened "Transvaalensis."

Embedded in the red Bushmen's limestone, Mr. Barlow found the skull, which is likely to be of great importance to anthropologists.

While the woman's skull had only three teeth, this new discovery has a complete set, both upper and lower teeth.

The Transvaalensis men probably walked half-upright. They were non-forest-anthropoids. Something more than monkeys but less than men, they did not climb trees, but made caves their homes.

According to Dr. Broom, it is not improbable that the first man evolved from this group of manlike apes. Thus Africa may be proved to be the cradle of the human race.

The Transvaalensis man lived in the Pleistocene Age, thousands of years ago, when dinosaurs and giant elephants roamed Africa. Probably these early men ate elephants.

Possibly they left the primeval forests to hunt for food with sticks and stones, and took shelter in caves when danger threatened.

Goes Out Of Business

London Firm Has Made Walking Sticks For 104 Years

Fashion's whim is pathetically revealed by the sudden passing of a London firm that had been making walking-sticks for 104 years, says Pearson's London Weekly. In the leisurely days of old, no man was completely equipped unless he had a smart walking-stick. Now-a-days with a great increase in sports and motoring walking-sticks have gone out of fashion, and the demand for them has almost vanished. One firm used to supply sticks to every corner of the world, including distant Tibet and Iceland; but even those countries no longer want walking-sticks. —Wall Street Journal.

If Women Were Paid

If you are a farm wife and you have been cooking the family's meals for a period of 30 years you have earned \$35,313—at least that is what Miss Julia Newton of the Farm Credit Administration told a farm women's meeting at Indianapolis. Miss Newton figured the labor of cooking a meal as being worth 15 cents a meal and she said that in 30 years there would be 235,425 meals.

Scientists contend that women are superior to men in those mental tasks which require quick thinking and attention to details.

Movie studios are able to save \$120,000 annually by recovering silver from the film-fixing baths.

There are 1,200 archaeological sites in Mexico.

ROYAL HOUSEHOLD NAME the PICTURE

This is what you do

Look at the picture and suggest a name for it. Then read the simple rules and you may win a cash prize. "Like Mother Used to Make" or "Caught With the Goods," or use any name you think is good. This is the second of three "Name-the-Picture" Contests. 86 prizes in each and \$250.00 Grand Prize for the best suggestion in the entire series. Enter today. Everybody loves bread, cakes and pies made with Royal Household Flour.

The Ogilvie Flour Mills Co., Limited
Montreal, Ottawa, Toronto, Fort William, Winnipeg, Regina, Medicine Hat, Calgary, Edmonton, Vancouver and Victoria.

ROYAL HOUSEHOLD FLOUR

Has Industrial Problem

Woman Chemist Searching For Ways Of Using Soy Beans

Dr. Helen Chataway, chemist at the National Research Laboratories in Ottawa, has an industrial problem dealing with the best methods of turning soy beans into oil, meal, flour, casein and a number of other products. These methods are in process of rapid development since it is only within the past few years that soya bean cultivation has leaped to a position of importance in North America. Even now the expansion of this industry in Canada is being retarded by the lack of sufficient seed of suitable Canadian varieties. Seed is being developed at several agricultural experimental stations.

In this breathing space the National Research Council plans that at least one of its staff shall become conversant with problems of the industry in the hope that by being ready to supply timely advice it may save many costly mistakes.

Likes Silly Symphonies

Queen Mary Film At Movies

Queen Mary has her film preferences. They were indicated recently at the premiere of "The Great Barrier," at which the Queen was present. Let it be said at once they include the "silly symphonies." And so when the program was being arranged for the first showing of the picture based on the story of the building of the Canadian Pacific Railway, an honored place was reserved for a Walt Disney farmyard adventure, with the distressed hen, the amiable chicks, the embarrassed dog, at all the antics of which Her Majesty expressed her undisguised delight.

John Hancock's signature on the Declaration of Independence was so large that his name has been synonymous with signatures ever since.

Malaya's improved buying power is reflected in big cigarette imports.

3 Big Contests—

First Prize \$100.00
Second Prize 25.00
Third Prize 15.00

Follow these

- 1 Write your title on the coupon with your name and address and that of your dealer.
- 2 With each title send the words "Royal Household" cut from the small leaflet in every bag of Royal Household Flour, or a reasonably accurate facsimile of same.
- 3 You may send as many different titles as you wish, but each must be accompanied by a section of the leaflet as outlined in Rule 2.
- 4 This contest will close April 24, 1937. All entries must be post-marked not later than that date.

WATCH FOR

RETAILERS: You share in this, too. Each dealer named by the three first prize winners, and the winner of the Grand Prize, will receive \$25.00.

The largest mass wedding in history took place in 324 B. C. at Susa, Persia when Alexander the Great had 10,000 of his Macedonian soldiers married to Persian Women at one time.

thy breast.
Turn thou to Him in every pain,
Whom never suppliant sought in vain;
Thy strength in joy's ecstatic day,
Thy hope when joy has passed away.

Beware of letting your care degenerate into anxiety and unrest, tossed as you may be amid the waves and winds of sundry troubles, but keep your eyes fixed on the Lord and say "My God I look to Thee alone; be Thou my guide and pilot", and then be comforted. When the shore is gained who will heed the toll and the storm. We shall steer safely through as long as our heart is right and our courage steadfast, and our trust is placed in God. All the storms we have to encounter are but opportunities for us to strengthen ourselves in the loving graces which our dear Lord sets before us.

Cost Would Be Prohibitive

Erection Of New Crystal Palace In London Unlikely

Is there to be a second Crystal Palace on the site of the old? It is highly unlikely that even if another house of entertainment should arise it will take the form of the former huge house of glass. The cost, for one thing, would be prohibitive.

The old Crystal Palace, moreover, is believed to have been a fine landmark for hostile aircraft during the war, much in the same way as the Thames proved another excellent guide for enemy airmen. In spite of this the Palace became "H.M.S. Crystal Palace" during the war when it was used for the training of the Royal Naval Division. Probably the government will be asked to give its aid to the building of a new palace, and its attitude towards such a scheme would obviously be influenced by consideration of national safety.

Used Right Method

Two years ago the British Minister of Transport selected four London streets which had a bad record for motor accidents. Pedestrian crossings were made clear, guard rails erected and signal lights instituted. An average improvement of not far from 20 per cent. was shown and now more thoroughfares will be treated in like manner. This looks like a practical plan for helping the pedestrian.

ITCHING

TORTURE STOPPED In A Minute! For quick relief from the itching of pimples, blotches, eczema, athlete's foot, rashes and other skin eruptions, apply Dr. D.D.'s cooling, antiseptic, liquid D. D. D. PRESCRIPTION. Its gentle oils soothe the irritated skin. Clear, greasiness and stinging—dries fast. Stops the most intense itching instantly. A 35c trial bottle, at drug stores, proves it—or money back. Ask for—D.D.D. Prescription

CHARLES GRANT

Charles Lewis Grant, Government road superintendent in this district, died in the M.S.A. Hospital on Wednesday of last week at the age of 63. Gastric ulcers, from which the deceased had suffered for some considerable time was the cause of the death.

The late Mr. Grant was born in Scotland and has resided in this district for 26 years. He is survived by his wife, two sons and two daughters in Victoria. He had been residing with a niece Mrs. Drinkwater on the highway near Taylor's Gas Station west of Abbotsford.

The funeral held by the Masonic Lodge was from the Henderson Funeral Home to Hazelwood Cemetery on Sunday afternoon, Rev. R. Moses officiating. Testifying to the deceased's wide acquaintance was the large number attending the service, there being a cortege of almost 50 cars. Honorary pallbearers were: W. Knox, S. Wood, R. McLaren, J. Murphy, I. Serl, A. Price. Active pallbearers were: J. Rowley, G. Gould, L. L. Caldecott, A. R. Gosling, D. McLeod.

Donations to Welfare Fund

Donations were gratefully accepted from the following during the month of March, by the Abbotsford, Sumas and Matsqui Welfare Fund: Mrs. Peyton, Mrs. H. Lambert, Mrs. W. Roberts and Anonymous.

MRS. M. HUGHES

The death occurred in Sumas, Wash. on Sunday of Mrs. Mary Alice Hughes, aged 77, after brief illness, following a heart attack three weeks ago.

The deceased, who was the mother of the wife of Rev. E. Baker, had resided in Abbotsford for several years, and latterly at Bradner with her son-in-law and daughter. She had a very wide circle of friends in the district.

The body is being taken, accompanied by Mrs. Baker and daughter Jane, to Sharnbrook, Que., for interment in the family plot. Besides her daughter, Mrs. Baker of Bradner, a son Harry, in California, survives.

Read what Western Canadian women say about the — **QUAKER** Easy method of Baking

"THE QUAKER EASY METHOD OF BAKING WITH QUAKER FLOUR IS SO SIMPLE... SO QUICK."

MRS. WILLIS METHER, Weyburn, Sask. "I wouldn't think of using any other method, especially when I get much better results, with half the time and trouble."

LIKE thousands of the finest cooks in Western Canada, Mrs. Methers insists upon using Quaker Flour in all her favourite recipes... she uses the Quaker Easy Method of Baking, too... that's why her bread and rolls are so much better.

Make your baking results better too. Use the Quaker Flour and the Quaker Easy Method of Baking... no kneading, no sponge to set overnight, and no chance of failure. Remember, Quaker Flour is not just ordinary flour, it is the best all-purpose flour money can buy—and is milled by the makers of the world famous Quaker Oats.

Send for FREE Booklet describing the Quaker Easy Method of bread baking.

Train Withdrawn

Effective Sunday, April 4 the milk train service on the Fraser Valley Interurban line of the B. C. Electric Railway company will discontinue operating on Sundays only. The last trip for this train on Sundays was March 28.

This train, No. 500, leaves Vancouver at 3.30 a. m. for Chilliwack, leaving Chilliwack as No. 501 on its return trip at 7.50 a. m. There will be no change in its week-day schedule.

A new can opener, designed for large cans of paint and oils, trims off the top of the can and rolls back the sharp edges into a safety rim.

Save Up to 40 Per Cent on Your Spring Orchard Sprays

You can make a saving of 30% to 40% on your cost of spraying your fruit trees this spring if you use Watkins Stock Dip (Insecticide, Dip and Disinfectant). Costs far less than nicotine, but does the job of controlling insect pests such as aphids, pear psylla, and oystershell scale. Leading growers recommend its use right through the season as a spreader and sticker with lime-sulfur and arsenate of lead.

Compare the Cost and I'll prove I can save you money. I can do it on other products that you need such as Fly Spray, Stock and Poultry Preparations and household products. I have some real bargains now on genuine high quality Watkins Products so it will pay you to wait for my call.

Washington Taverns to Close Sundays
By order of Washington State Governor Clarence Martin, all beer parlors in the state will be compelled to close on Sundays. The order goes into effect April 1, so last Sunday was the last "open" day. The law will most seriously affect border towns and beach resorts.

NEWMAN—CURTIS
The marriage of Miss Leonora Curtis, daughter of Mr. and Mrs. Mark Curtis of Upper Huntingdon, and Mr. Cyril Newman of Cloverdale, B. C. was held in Bellingham on Tuesday afternoon, March 23. They were accompanied by the groom's brother, Eric Newman, and by Clarence Caul of Huntingdon.
After a brief motor trip to Seattle and other cities they will return to Lambs Camp at Minzies Bay, Vancouver Island where Mr. Newman has employment for the next few months. They will later reside on their farm at Cloverdale.
Washington-Alaska Railway Routed?
Completing an unofficial survey of the proposed Washington-Alaska railway route through British Columbia three U. S. Army engineers left Canada through Huntingdon recently. They had been in the northwest territory for several months. Informants in the United States assert the increased tension between the U.S. and Japan over the Alaska fisheries is hastening the serious consideration of the project because of its military significance.

Restoration Of Fertility

The task of restoring moisture reserves and resultant fertility of the soil of the prairies is a big one. It is quite evidently one which will have to be undertaken on large scale plan before wide-spread results can be ensured and will have to be carried out on a co-operative basis with the backing of well matured and carefully thought out plans.

In this column some months ago it was pointed out that deserts can be, and sometimes are, made-made. No one who has been observant and has given some consideration to what has been taking place since this country was settled who will not contribute to the belief that to some degree the devastation which has been wrought by dust storms and drought on the open prairies in the past few years is attributable to wasteful and heedless methods of cultivation of the soil.

To what extent lack of moisture which brought about conditions from which agriculture has suffered so seriously in the past five or six years can be charged up against cultivation methods and other doubtful practices is problematical and cannot be scientifically measured, but that the severity of the drought was accentuated by such practices is undoubted and certainly some of the damage wrought by dust storms could have been averted had other methods been pursued.

It may be taken for granted, however, that the damage done is not irreparable and that adoption of appropriate methods of cultivation and conservation, intelligently applied, can go a long way towards avoidance of repetition of serious loss and may even, in some instances, improve the productivity of the soil. If human agencies can create desert conditions it is not unreasonable to suppose that the same agencies can undo the harm which has been caused, though this process of rehabilitation may be a lengthy and expensive one.

Some valuable evidence of the feasibility of man-made plans to restore moisture and productivity to the soil was given recently by W. L. McTavish, managing editor of the Winnipeg Tribune in an address to the Regina Board of Trade when he outlined the satisfactory outcome of a rehabilitation project in Manitoba in the following words:

"A year ago we dammed the outlet where the waters of Lake Manitoba descend to Lake Winnipeg. The level of Lake Manitoba was brought back in a year to its former point and then a year later we's in the Portage Plains which had become deep wells as the waters of Lake Manitoba receded, were brought back to former levels. There were districts in the Portage Plains which had no rainfall last year after the first week in June which nevertheless produced good crops. The answer was to be found in a higher water table in the subsoil, consequent upon the higher water levels of Lake Manitoba. There was moisture underlying the Portage Plains last summer and the wheat roots went down and found it."

The result of this Manitoba experiment should furnish a lot of consolation to the people of the prairie provinces. It demonstrates that with forethought and the application of understandable scientific principles to the problem man can do something more than just sit down supinely and hope for rain; that Nature will help him who helps himself; that there is real hope for the future by the application of intelligent action.

It is true that not all sections of the prairie provinces could be benefited by a project similar to the Lake Manitoba dam scheme, but other projects and other methods are adapted to other districts, as appropriately pointed out by Mr. McTavish when he said:

"We have got to take advantage of every aid we can—strip farming, binding grasses, legume crops and everything of that sort that we can use to aid in this work, and we have got to work everlastingly to impound in the west every drop of moisture that falls from the heavens. We must impound it by means of dams, we must impound it by means of trees and grass lands. We must bring up the water table in the subsoil. We must work to conserve moisture by breaking up the drying winds."

"It is a job for the next ten or twenty years, but we should be at it with all the energy and all the brain power we can command. We have done a good deal towards destroying this western country. Now we have the job of reclaiming it."

A good deal has been said recently about governments being urged to adopt crop insurance schemes which may or may not be economically feasible. Whether such insurance plans are put into effect or not, undoubtedly projects and practices which will effectively conserve moisture for the benefit of the crops will do more for agriculture and will probably be more remunerative and less expensive in the long run, and hence, cheaper and better insurance against one of the major and periodic hazards.

Population Figures

Gain Of About 61,000 On Prairies In Past Five Years

A gain of about 61,000 in population of the prairie provinces in the past five years is shown in final figures of the 1936 census published by the Dominion bureau of statistics.

The total of 2,414,891 for Manitoba, Saskatchewan and Alberta, compared with 2,353,529 when the previous census for those provinces was taken in 1931.

Following is the population by provinces with the previous quinquennial census figures in brackets: Manitoba, 711,216 (700,139); Saskatchewan, 930,893 (921,785), and Alberta 772,782 (731,605).

Figures for cities with populations of 10,000 or over were given as follows: Brandon, 16,461; Calgary, 83,407; Edmonton, 85,774; Lethbridge, 13,523; Moose Jaw, 19,805; Prince Albert, 11,049; Regina, 53,354; St. Boniface, 16,275; Saskatoon, 41,734; and Winnipeg, 215,814.

The woman who drives from the back seat of a car, says a cynic, is no worse than the man who cooks from the dining-room table.

During the windy spring months, Nature prunes her trees by breaking off the dead limbs to make room for new ones.

"Who has a good word for rate-collector?" asks a writer. We heard one the other day, but it's not printable.

"A Case of Nerves"

ALL women at some period of their lives need a strengthening tonic like Dr. Pierce's Favorite Prescription. The young woman who suffers from monthly pains, the expectant mother who has nausea and other disagreeable symptoms, or the middle-aged woman who experiences "heat flashes" and nervousness, should try this "Prescription." Mrs. W. Baker of Route 6, Coleraine, Ont., said: "I used Dr. Pierce's Favorite Prescription through the change of life and felt so well. I still take it occasionally to keep me well and make me have a good night's rest. I find it wonderful for a case of nerves." Buy now! New size, tablets 50 cts., liquid \$1.00.

Outstanding Aviators

Jean Batten And Howard Hughes Awarded Harmon Trophy

Jean Batten, the New Zealand girl who made a record-breaking solo flight from England to New Zealand, and Howard Hughes, the American highspeed transcontinental flyer, were awarded the Harmon international trophies as the outstanding aviators of 1936.

The awards were made by the International League of Aviators, headed by Colonel Clifford B. Harmon of New York.

Hughes set a non-stop transcontinental speed record Jan. 14, 1936, and then broke it Jan. 19, 1937, when he flew from Los Angeles to Newark in seven hours, 28 minutes 25 seconds.

Miss Batten's record flight from England to New Zealand was made in 11 days, 57 minutes.

Thinks Expedition Safe

Sir Hubert Wilkins May Take Wife On Under-Ice Trip

Sir Hubert Wilkins, noted explorer, said he believed submarine expeditions into the Arctic are so safe he is seriously considering taking Lady Wilkins with him on his next jaunt beneath the Polar ice.

Sir Hubert, who said his submarine is being built in England for a northern voyage during the summer of 1938, added, "there is no reason why women and children should not undertake such a trip."

"Of course I'm going along," said Lady Wilkins.

A penknife weighing 42 pounds and having 1851 blades is the largest ever made. It is valued at more than \$7,500.

The largest sea serpent known to science is a sea cobra, a paddle-tailed snake which attains a length of 10 feet.

A pyramid 148 feet high has been erected so that tourists may obtain a better view of the battlefield at Waterloo.

Britain has increased its outlay for lighthouses 25 per cent.

The Cheerful Worker

Is One Who Starts Day Right With Good Breakfast

The world would be a nicer place in which to live if we had and observed a creed for breakfast. This applies more particularly to city folks. The cheerful citizen in business is such because he is fortified by a good breakfast. The rest of us have too limited a time table and rush the first meal to get to work and to land downtown cantankerous cranks and become unpleasant in all the morning transactions. Breakfast should be a rite, observed leisurely in preparation for whatever the day may bring. Fortified with a satisfying breakfast man can meet even fate with courage and equanimity. Of course, some medics advise sparse breakfasts, but you can tell the abstemious breakers of the fast in their mornings by their demeanor and manners in their customary intercourses. In the morning they are as unpopular as the rush-counter breakfasters.

And the breakfast time limit habit has been encouraged by prepared food manufacturers. It isn't vitamins we ought to count in our breakfast foods but time and not fast time. But housewives, who are not, of course, to be blamed, are for quickly prepared dishes for breakfast. At the same time they suffer the doldrums of a wage-earner with the cranky breakfast-time feeling, or hangover perhaps. With all the rush of that morning meal there is a fraying of everybody's nerves and the ragged edges rub. What is needed is a breakfast smile to start a happier day. This world would be much more humane and crime might be curbed if we prepared a new dogma for breakfasts, and took time to observe the rites.—Brandon Sun.

WAKE UP YOUR LIVER BILE—

And You'll Jump Out of Bed in the Morning Rarin' to go

The liver should pour out two pounds of liquid bile into your bowels daily. If this bile is not flowing freely, your food doesn't digest. It just decays in the bowels. Gas bloats up your stomach. You get constipated. Harmful poisons go into the body, and you feel sour, sunk and the world looks punk. A mere bowel movement doesn't always get at the cause. You need something that works on the liver as well. It takes those good, old Carter's Little Liver Pills to get these two pounds of bile flowing freely and make you feel "up and up". Harmless and gentle, they make the bile flow freely. They do the work of calomel but have no calomel or mercury in them. Ask for Carter's Little Liver Pills by name. Stubbornly refuse anything else. 25c.

A New Star

Find Celestial Neighbor Of The World, But Some Distance Away

Astronomers have catalogued a new celestial "neighbor" of the world—if you can call 42 trillion miles a neighborly distance. Dr. Willen J. Luyten, head of the University of Minnesota's department of astronomy, announced discovery of the star in the constellation Aquarius and six or seven light years away. Dr. Luyten said the new star was close enough so its arc across the heavens was equalled by only 12 or 14 stars. The new star is 25,000 to 30,000 times fainter than the sun. It is 14.3 magnitude, and the human eye can see only down to the sixth magnitude.

Great Britain's Warning

Rearmament Is Not For War But To Ensure Peace

Great Britain is loading her revolver. Moreover she is doing it in full view of a watching world, not through boastfulness but simply as a convincing demonstration that the old, starchy-eyed, mush-minded days are over when her ministers thought that a Geneva resolution was a substitute for ten dreadnaughts. When these ministers to-day look out over the effervescent continent of Europe, they are not looking for beloved allies for whom to die but for possible enemies whose predatory attacks must be repelled. They want peace with everybody. They do not want war with anybody.—Montreal Star.

In Spite Of Handicap

Performance Of Opera By Blind Actors Was Excellent

Blind man's buff is an old game, but a blind man's opera is something new. Sheffield has been to see and to encourage a brave effort made by some of its blind people. An opera written by Mr. A. Varley, one of the city's blind men, has been performed by blind men and women at Sharrow Grange Hall, Sheffield, England, and the performance was excellent, the actors moving about with wonderful assurance. Called "The Stowaway", the opera was the first written by the blind composer, and the entire production was a magnificent proof of the way in which handicaps can be overcome by courage. 2193

I'm an old roll hand

I use a Fine Cut grand! Fragrant, mellow Ogden's—that corrals full smoking enjoyment for roll-your-owners. Whether you're already an old roll hand or are "fixin' to start in now" try Ogden's with "Chantecler" or "Vogue" papers. That combination will teach you all there is to know about pleasure in rolling your own.

SELECTED RECIPES

CHELSEA BUNS (Quick Method)

Temperature: 400-375 degrees F. Time: 30 minutes.
1 cup milk; 2 tablespoons sugar; 1 teaspoon salt; ½ cake fresh yeast; 2 tablespoons lukewarm water; 3 cups Royal Household flour; ¼ cup sugar; 3 tablespoons butter.

Filling

2 tablespoons softened butter; ¼ cup Sultan raisins; ½ cup brown sugar; 1½ teaspoons cinnamon.
Method: Scald milk; cool to lukewarm. Dissolve yeast in lukewarm water and add to milk mixture; add 1 cup flour. Beat until smooth. Let rise in a warm place until foamy. Add remaining sugar, flour and butter. Turn on floured board and knead until smooth and elastic. Place in greased bowl; let rise until light. Punch down to release gas bubbles. Knead lightly and roll ½ inch thick. Spread with filling; roll as for jelly roll. Cut with sharp knife or scissors, into one inch slices. Place close together on greased baking sheet. When light, bake in moderately hot oven. Entire time for making these buns is approximately four hours. Recipe by Mildred Mae MacKenzie Copyright.

BAKED APPLE PUDDING

Temperature: 350 degrees F. Time: 1 hour.
6 tart apples
½ cup water
1 teaspoon cinnamon
¾ cup brown sugar
¼ cup Benson's corn starch
6 tablespoons butter
Pare, core and thinly slice the apples into a greased baking dish or casserole, adding the water and cinnamon. Blend together the sugar, Benson's corn starch and butter until quite crumbly and sift over the apple mixture. Bake in a moderate oven. Serve with cream. Note: Be very sure to measure these ingredients carefully. If too much corn starch is used, the mixture will become doughy instead of crisp. The finished pudding should have a crisp top.

Good News For Many

British Broadcasting Company Takes Steps To Curb Crooning

The British Broadcasting Company, convinced there has been too much crooning, has taken steps to limit the number of throaty singers on the airwaves.

While declining to define the difference between crooning and straight singing, the company has limited dance bands to one croon for every three numbers.

Must Keep Moving

We have just heard a unique explanation of why an internationally known orchestra leader is not proving the drawing card he was expected to be. One of the officials put it this way: "He worked hard and got to the top, but he made the mistake of thinking he could stand still on the top without trying to go higher and do better."

Voting is not a good old American custom. Citizens of the Greek city states, the Roman Empire, and the Germanic tribes voted long before our time.

While exploring ruins of Tepe Gakira, Mesopotamia, archeologists found meat bones in a pot, apparently just as they were put on the fire to stew centuries ago.

MATRON REALIZES A SMART ENSEMBLE WITH SLIMMING JACKET-FROCK!

By Anne Adams

You'll be the "leading lady in the Easter Parade" this Spring if you wear this flattering ensemble! Slenderizing and easily made, you'll find this dress and jacket combination fashion-right for a vacation jaunt, club-meeting, dinner in town or shopping tour. Once it's yours you'll pride yourself on your new, slim silhouette, for both jacket and frock are designed along the most slimming lines. It's ever so practical in figured crepe, triple-sheer or monotone synthetic. And you can have a bit of variety by making jacket and frock of contrasting material.

Pattern 4217 is available in sizes 16, 18, 20, 22, 24, 26, 28, 30, 32, 34, 36, 38, 40, 42, 44 and 46. Size 36 takes 5½ yards 39 inch fabric. Illustrated step-by-step sewing instructions included.

Send twenty cents (20c) in coin or stamps (coin preferred) for this Anne Adams pattern. Write plainly Size, Name, Address and Style Number, and send order to the Anne Adams Pattern Dept., Winnipeg Newspaper Union, 175 McDermot Ave. E., Winnipeg.

Book Is Expensive

First copy of the coronation souvenir book of traditional colors, issued by the British Color Council, has been accepted by the King. The issue is limited and costs \$15. The de luxe edition signed by the patron of the council, Lord Derby, is \$25. Proceeds will go to the King George V. memorial fund.

Venus is better fitted to support human life than any other planet except the earth.

"I can never forget you." "You managed it all right on my last birthday."

In Japan a new enamel will not discolor at high temperatures.

Fans Regained Composure

National Anthem Checked Demonstration At Canada-England Hockey Game

Old England gave a tip to hockey authorities overseas on how to stop a noisy demonstration at a hockey game.

The secret is to play the National Anthem.

It was done during the Canada-England game at Wembley before 11,000 spectators when the game was halted 15 minutes with fans hurling debris of all sorts on the ice in protest over banishment of two players who fought.

As the strains of "God Save the King" were heard the audience stood rigidly at attention and the demonstration was over. By the time the anthem had ended even the most partisan had recovered their composure and the game proceeded.

News that Italy has devised a process of making wool out of milk must make the cows feel rather sheepish.

In China's 1920 quake, 180,000 people lost their lives in a few minutes.

The Japanese earthquake of 1923 caused the death of nearly 100,000 people.

If You Have a Child

ASK YOUR DOCTOR THIS

Ask Him Before Giving Your Child an Unknown Remedy

Practically any doctor you ask will warn: "Don't give your child unknown remedies without asking your doctor first."

When it comes to the widely used children's remedy—"milk of magnesia," the standard of the world is established. For over half a century many doctors have said "PHILLIPS' Milk of Magnesia." Safe for children. No other is "quite like it."

Keep this in mind, and say "PHILLIPS' MILK OF MAGNESIA" when you buy. Now also in tablet form. Get the form you prefer. But see that what you get is labeled "Genuine Phillips' Milk of Magnesia."

Also in tablet form: Each tiny tablet is the equivalent of a teaspoonful of genuine Phillips' Milk of Magnesia.

MADE IN CANADA

PHILLIPS' MILK OF MAGNESIA

Britain's Automobile King Gave Millions In Making Philanthropic History

England has a saint to the fact that it has a real Santa Claus, who works at his benevolent trade the year round, and all England is excited about it. Because it is almost a first-time experience for the little man who was reared as plain Bill Morris and was made by his King a member of the peerage under the title of first Baron Nuffield.

For years Lord Nuffield, Britain's most authentic automobile king, has been giving away sums ranging from \$100,000 to \$500,000 to various hospitals and medical research funds. It is a sort of tribute he pays to his boyhood dream. He wanted to be a surgeon. Poverty and fate decreed otherwise. But these gifts were mere flea-bites to what he was preparing to do. He has made philanthropic history for Britain in recent months. He donated to Oxford University the sum of \$6,250,000 for the founding of a great institution for medical research. In November he was present at what is called a "convocation" of the university. He sat on the platform with the learned big wigs. Suddenly Lord Nuffield rose and electrified his hearers. He said he had been told that a great medical research institution, such as he had in mind, would need at least ten million dollars. Therefore, he proposed to raise his own ante from \$6,250,000 to \$10,000,000.

While the English public still was dazzled by this, Lord Nuffield came to bat again. He announced he would give a fund of \$10,000,000 to help the depressed areas in South Wales. He said he did it to give practical shape to the current expression of love towards the new King George Sixth, to do anything he could in support of the National Government and to express his admiration for Premier Baldwin.

Next, he turned over a block of stock in his company, worth over ten million dollars, for the benefit of the 15,000 workers in his nine plants at Oxford, Coventry and Birmingham. He said he wanted them to be shareholders in the concern and enjoy dividends too. His scheme is to keep the block of stock intact, but every year to divide the dividends among the workers.

William Richard Morris was born at Cowley near Oxford in 1877, his parents being poor folk. As a youth of 16 he started working as an apprentice in a shop in Oxford where bicycles were sold and repaired. His accumulated savings, after a year, were just \$25. With this he started a bicycle repair shop of his own in an obscure side street of Oxford. It was not long before he was building bicycles. Moreover, he became a racing cyclist to advertise his own wares and won seven championships in the counties of Berkshire, Buckinghamshire and Oxfordshire. He kept a step ahead of others when he foresaw a coming boom in motorcycles, so he began making them and prospered.

Next he conceived and built a cheap little motor car. He sold 400 his very first year. The war intervened and he turned to making munitions. At the war's end, he had to begin all over again, as his trained personnel was scattered and his machinery either worn out or changed. When depression hit the motor business and other English manufacturers sought to hold down production by raising the price of their cars, he built a popular car and cut his prices. His business flourished like the proverbial green bay tree. So he bought out a number of others and consolidated their plants with his.

Even with all the money he has given away, he is worth \$100,000,000, taking into consideration only the market value of the stock he holds in his concern. Unlike other new millionaires who have been ennobled, he is not holding on to his money to found a new dynasty in the peerage. He has no son to whom the peerage will fall.

This childlessness is the one big sorrow in the lives of Lord Nuffield and his wife. They are one of the most devoted couples in England and she is the least publicized woman. Photos of her are unknown. When he was plain Bill Morris, she was Elizabeth Maud Anstey, young school teacher, whose father was an Oxford furrier. They wed 32 years ago. To-day, with everything money can buy, Lord Nuffield's three hobbies are his home, his work and his golf.

He still retains his plain little office, while some of his directors have palatial ones.

The world's largest consumer of sugar is the United States.

Value In Old Cars

Many Parts Salvaged And Re-vamped Into Something Else

Leaders of the American automobile industry estimate that during the next five years 15,000,000 automobiles now operated in the United States will be put on the scrap heaps. During those five years it is further estimated that 20,000,000 new cars will be made and sold, so that about 1942 there will be 5,000,000 more vehicles in the country than there are now.

It is estimated that the life of the average automobile is eight years. Some owners may hold onto their cars much longer than that, but the average car changes hands several times before it is finally discarded. As each year passes its value as well as its serviceability steadily diminish, until it reaches the stage when it becomes too dilapidated to operate except at cost of too much money and risk of accidents.

Many parts are salvaged and re-vamped into something else. There is an immense scrap-iron value in old cars, and the body of the rattling vehicle that may be seen on the streets this year may be part of the structure of a house, a ship, a locomotive or a thousand and one other uses next year.—St. Thomas Times-Journal.

Disappearance Of Ice Fleet

London Uses Artificial Product Instead Of Imported Article

Up to the outbreak of war in 1914, among the regular traders to the River were the brigs and bargues and wooden steamers which brought ice from Norway. Among the many results of the World War has been the entire disappearance of London River's ice fleet, for artificial ice has supplanted the imported article. Over in Norway, especially near Christiania and at the Skien Fjord, water spaces used to be carefully kept for the winter ice trade, and when a certain thickness had been reached ice ploughs with a sharp share were used to enable blocks of considerable size to be cut out for loading into ship or else transferred into storehouses by the water-side. Notable among the ice fleet were the Whitstable brigs, manned by British seamen, which regularly came up to Billingsgate market where the blocks were weighed on the ship's deck and then carried ashore by stalwart fish-porters. Some discharged in London Dock.—P.L.A. Monthly.

Will Have Padded Stalls

Mounties' Horses For Comfort Parade To Travel In Comfort

"All the King's Horses and all the King's Men," so far as Canada's contribution to the coronation of H.M. King George VI. is concerned, will include 35 scarlet-coated members of the Royal Canadian Mounted Police and their smartly schooled horses.

Horses and men will not travel together. The mounts accompanied by six troopers, are scheduled to leave Montreal five days ahead of the party and will travel directly to London in the Canadian Pacific freighter Beaverhill. For their accommodation, padded stalls will be specially constructed in Montreal. Horse-loving members of the Beaverhill's crew have volunteered to assist in caring for the valuable animals during the Atlantic crossing.

The horses will be landed at the Surrey Commercial Docks in South London, thus obviating any train travel in England.

Return to Canada will be made aboard the Beaverford, sailing from London May 20.

YOURSELF

Just stand aside and watch yourself go by.
Think of yourself as "he" instead of "I".
Pick flaws, find fault, forget the man is you,
And strive to make your estimate ring true.
The fault of others then will dwarf and shrink,
Love's chain grow stronger by one mighty link,
Where you, with "he" as substitute for "I",
Have stood aside and watched yourself go by.
—From Canadian Churchman.

On the Nicobar Islands, in the Bay of Bengal coconuts are used as money. 2193

Discloses Forgeries

New Process Will Quickly Restore Obliterated Ink Writing

A new, quick and simple process for restoring obliterated ink writing was announced in Chicago by Northwestern University's scientific crime detection laboratory.

It was developed by M. Edwin O'Neill, instructor in police science, for use in disclosing forgeries in wills, contracts and other documents.

The apparatus is so simple it can be carried in the pockets of law enforcement agents and employed with dramatic effect before judges and juries.

It consists of a gouch funnel—a tube-shaped glass six inches long. The opening on the large end is the size of a quarter. The other tapers off into a stem and mouth piece. The midsection of the instrument is packed successively with wads of glass wool, potassium sulphocyanate and cotton moistened with hydrochloric acid.

O'Neill blows through the stem on the portion of the document suspected of having been altered by erasure or chemicals.

"If iron is in the ink of the erased portion," the announcement said, "it will react with the sulphocyanic acid vapor and emerge immediately into view."

"Nearly all the blue-black and black inks commonly used to-day contain iron. When these inks are removed the invisible iron residues in the paper are not affected so that the original writing in many instances can be restored."

Seahorse Is Talkative

Expert Believes They Can Communicate With One Another

A U.S. government expert, learned in the lore of the ocean deep, vowed that he had overheard fishes talking to each other.

After an exhaustive study of the life of the hippocampus, a mysterious creature popularly called the seahorse, Isaac Ginsburg of the U.S. bureau of fisheries, reported to the Smithsonian Institution:

"The seahorse has the distinction of being one of the species of fish that 'talk.' It makes almost inaudible snapping noises with its jaws which seem to serve as a means of communication."

The seahorse resembles the fearsome creatures of delirious tremors. It has the head of a small horse, the tail of a monkey, the shell of a beetle, the pouch of the kangaroo, and eyes which enable it to look forward and backward at the same time.

Despite its grotesque appearance the hippocampus is a small, feeble, almost defenseless creature, Ginsburg said.

Because it is a poor swimmer, it spends most of its time with its tail wrapped around the stem of a water plant. From this vantage point it snaps up other tiny sea animals floating within reach.

The eyes of the seahorse move independently of each other, making vision possible in two directions at the same time.

Old Pottery Found

Pottery and heiroglyphs have been recently discovered in the mining country east of Lake Winnipeg in Manitoba. This indicates the presence of a race there 20,000 years ago that may have been related to the Egyptians.

Germany is importing more chemicals than any other country.

Headed For Museum

Gold Piano In White House Is Costly But Ugly

The venerable gold piano at the White House which came to live there in the Administration of Theodore Roosevelt is soon to retire to the National Museum. For thirty years it has served as a musical capacity and as a "sight" for sight-seers. Now it can be told, however, that it was not wholly a success in either respect. Talented musicians invited to play at the Executive Mansion have been known to hint that there were other pianos they would as willingly play. Its roccoco magnificence escaped neither notice nor comment. And thereby hangs a tale:

Once upon a time an attractive young schoolteacher from Massachusetts shepherded a group of students to Washington to see the capital at vacation time. Of course, the East Room and the gold piano were among the sights. The young teacher stepped up to the piano and put her hand on it.

"Please do not touch the furniture," admonished a guard, tapping her on the shoulder.

This teacher told the story years later.

"The piano was so ugly I felt like kicking it," she said.

That teacher was Grace Goodhue. She became Mrs. Calvin Coolidge and found the piano still there when she became mistress of the White House. Evidently, she never changed her opinion about it, for she is said to have confessed that she did give it a couple of kicks when she could do so with no one say her nay.

Will Likely Take Part

Princess Elizabeth May Appear In Royal Procession At Coronation

Princess Elizabeth will probably take part in the Royal Procession in the Coronation, says the Daily Telegraph. Princess Margaret, on account of her age is expected only to "attend" the ceremony. Princess Elizabeth, who will then be 11 years old, may lead the procession of Princes and Princesses of the Royal. She will probably wear a coronet, which she will place on her head when Queen Elizabeth is crowned. If she appears in the procession she will also wear a robe of her rank and be attended by members of the Royal Household. The Princess will do homage by placing her coronet on her head when the Queen is crowned—the homage performed by members of the feminine sex. Although half-presumptive, she will not do homage with the peers, one reason being that she is a minor. The King and Queen and probably Princess Elizabeth will be central figures in the most notable dress rehearsal of the year—that for the Abbey pageant.

Place Names

"Odd names your towns have," commented the Englishman—"Weehawken, Hoboken, Poughkeepsie, Oshkosh."

"I suppose they do sound queer to English ears," the American agreed thoughtfully. "Do you live in London all the time?"

"No, indeed," said the unsuspecting Briton. "I spend part of my time in Chipping Norton and divide the rest between Biggleswade and Leighton Buzzard."

The Theobroma cacao, a small evergreen tree native to tropical America, yields the large nutritious seeds from which chocolate and cocoa are made.

Coat And Tam Prove Easy-To-Knit

Household Arts by Alice Brooks

Tot Will Love This Set For Spring

PATTERN 5545

If you want her eyes to brighten with delight, knit her this adorable coat and tam of sports yarn. Any four-to-eight year old will love this ensemble. The coat is mainly plain knitting, with cuffs and yoke in knit-and-purl stitch. This combination of knitting and purling is repeated in the tam. In pattern 5545 you will find complete instructions for a knitted coat and beret in sizes 4, 6 and 8 (all given in one pattern); illustrations of them and of all stitches used; material requirements.

To obtain this pattern send 20 cents in stamps or coin (coin preferred) to Household Arts Dept., Winnipeg Newspaper Union, 175 McDermott Ave. E., Winnipeg.

There is no Alice Brooks pattern book published

Tug Boats Constructed At Quebec To Be Put In Service On Mackenzie River

Variations Within Forage Crops

Investigations Proceeding For Discovery Of Suitable Grasses

Experienced observers can easily recognize the principal forage crops, but many farmers find it difficult to distinguish between the principal grasses. Besides difference in appearance, the characteristic root development, drought resistance, winter hardiness and other qualities of the grasses and clovers are not readily perceived.

Within each forage crop, there exists a vast number of types which may be separated only by plant breeders or others schooled in the recognition of selections. Such work is in progress at many of the experimental stations of the Dominion Department of Agriculture, and other agricultural institutions. Alfalfa was among the first to receive attention, though none of the Grimm selections have supplanted the parent material. Ladak is far from fixed in type, and the Dominion Sub-station at Beaverlodge and others are concentrating on isolating and developing some of the likely-looking strains.

To commercial stocks of Western ryegrass have been added wild types indigenous to the West and three main selections are now recognized—Grazier, Fyra and Mecca.

Brome is the best all-around grass for the Park belt but common stocks are difficult to eradicate. The Parkland selection, being more leafy and having less vigorous creeping roots, will soon be distributed and may overcome some of the shortcomings of the unselected material. As much can be said for other crops. While on the watch for valuable introductions from other lands, there is still plenty of improvement to be made on the material now at hand. Canada is a recognized leader in this phase of agricultural investigation.

Eskimo Finds Old Papers

Pertaining To Voyage Of Rescue Ship In 1854

Charles Brower, Arctic trader, studied faded papers pertaining to the voyage of the British ship Enterprise in search of the Sir John Franklin expedition 87 years ago.

An Eskimo said he found the can on a beach 300 miles east of Point Barrow.

Brower intends to forward the papers to the British Admiralty for historical purposes.

H.M.S. Enterprise, commanded by Capt Richard Collinson, was one of many ships which searched for the lost Franklin expedition, last seen in 1845. The Enterprise was at Point Barrow in 1854.

It was not until 1879-80 the bodies of some members of the Franklin expedition were found, though proof of their deaths was established in 1859 by possessions returned on H.M.S. Fox.

Proved It All Wrong

Smart Student Had Professor Thinking Figures Can Lie

"Arithmetic is a science of truth," said the professor earnestly. "Figures can't lie. For instance, if one can build a home in twelve days twelve men can build it in one."

"Yes," interrupted a quick-brained student. "Then 288 will build it in one hour, 17,280 in one minute, and 1,036,800 in one second. And I do not believe they could lay one brick in that time."

While the professor was still gasping the smart "ready reckoner" went on:

"Again if one ship can cross the Atlantic in six days, six ships can cross it in one day. I don't believe that either; so where's the truth in arithmetic?"

Then he sat down.

Was Clever Botanist

John Grimshaw Wilkinson, 81, blind botanist who told flowers by touching them with the tip of his tongue, trees by the sound of raindrops on their leaves, is dead at Leeds, England. Wilkinson lost his sight when he was 23. He developed his other senses so highly that he greatly minimized his handicap and was able to pursue his scientific work.

One Street To Avoid

Three motor accidents were experienced by a motorist on oddly located streets of Pittsfield, Mass. His first accident on North street, his second on South street and his third on West street. He's steering clear of East street.

Two large craft of the push-tug type are under construction at Sorel, Quebec, for use on the Mackenzie, Athabasca and Slave Rivers, 2,000 miles away in Canada's far north where many of the river bends are so short it is impossible to pull a scow around corners.

Construction of the two "tugs" writes an interesting page for ship-building in Canada. Similar craft are in use on the Nile in Egypt. Hitherto river navigation in the Canadian north has been in old type wooden stern wheelers. The new boats will be of the steel twin-screw tunnel type, permitting very shallow draft. The one designed for use on the Athabasca and Slave rivers draws only 21 inches when loaded.

After an extraordinary portage across half a continent, the boats will go into service this summer carrying supplies to the mining camps of the Northwest Territories and bringing back radium concentrates and other ores. This will mark another step in the northern march of civilization. The boats will be equipped with refrigeration chambers, making it possible for the first time to transport fresh meats and dairy products in quantity for regular distribution.

Of welded steel construction, the boats will be assembled just as they will be launched 2,000 miles away. Workmen will then saw them into 20-foot sections—like you would cut a cake. Thus they will be shipped on railway cars to railroad at Watrous and carried by sleigh and tractor to Fort McMurray.

Twenty-three passengers and a crew of ten will find accommodation on the first "tug" when it goes into service on the Athabasca and Slave Rivers between Fort McMurray and Fitzgerald in May. The vessel will be 86 feet long and 20 feet broad. It will afford cabin accommodation for eight passengers deck facilities for the others. The second boat will ply between Fort Smith and Fort Norman on the Mackenzie River and Great Slave Lake.

Of significance to the north country and to the mining industry of the Dominion is the fact these boats will make it possible to bring out three times the quantity of radium concentrates that can now be transported to railroad. They are being constructed for the Northern Transportation Company, wholly owned subsidiary of Eldorado Gold Mines Limited, whose radium mine is at Labine Point on Great Bear Lake.

Tartans In Demand

Scotland Receives Orders From Canada And Other Countries

Hand-woven tartan cloth is in demand, and throughout Renfrewshire, and more especially in the village of Kilbarchan in Scotland, famed for centuries for its hand-loom weaving, many orders have been received.

These are not only Scottish orders. Many have been received from abroad, especially from Australia, Canada, and America. Much of the work, of course, will be done on power-loom weaving machines.

Only the cloth is woven in Kilbarchan, and it is then sent to various firms to be made into kilts, scarves and rugs. Large quantities are being woven in every variety of tartan.

At one time there was a large number of weavers in Kilbarchan, but the group has now been reduced to 15, and these men, helped by their wives, are fully employed in coping with the orders.

Just Mildly Interested

Spieler At Aviation Show Did Not Recognize Visitors

Two patrons at the Aviation Show in New York wandered through the hall the other day, pausing at each booth, says the New York Post. A spieler at the Manhattan Aviation School booth asked: "Are you boys interested in flying?" ... When they nodded, he continued: "It's so easy to learn how to fly. Just give us a chance, and who knows—some day you may be famous, recognized, etc." ... The men listened attentively, stated they were interested and delivered their address cards. One was Frank Hawkes. The other was Clyde Pangborn.

If not redeemed, jewels taken from smugglers are sold at public auction at the port where they were seized.

Montreal, 1,000 miles from the Atlantic, is still 500 miles nearer Liverpool, England, than New York.

MITCHELL-BUSH

In a quiet ceremony on Tuesday last at the home of the bride's parents, Rev. S. V. H. Redman united in marriage Joseph Mitchell of Abbotsford and Miss Gwyneth Bush, daughter of Mr. and Mrs. Edwin Bush of Mission City.

The bride entered the drawing room to the strain of the wedding march, holding the arm of her father, and took her place for the ceremony under an archway in the Easter motif. She was attended by Miss Kathleen Matthews of Vancouver, the groom being supported by his brother Mr. Alexander Mitchell. The ceremony was performed in the presence of immediate relatives and friends who heartily joined in the happy felicitations. After a brief trip the couple will reside in Vancouver.

Word has been received that Dick Douglas, grandson of Col. and Mrs. E. H. Cope, who was visiting here last summer, is one of the Edmonton schools students selected to attend the Coronation.

Abbotsford Beat Richmond; Tie Langley Footballers, 2-2

Abbotsford soccer team defeated the Richmond eleven by a score of 3-0, on Good Friday, at the Jubilee grounds.

Play in the first half was fast and fairly even. The locals drew ahead when one of the Richmond defense men put the ball through his own goal. Previous to that, Abbotsford narrowly missed on two occasions, on efforts by Godson and Ralston. Abbotsford took the aggressive in the second half, penning Richmond in their own goal. Blacklock scored on a nice shot, and not long after, Johnson scored after a nice cross from the right wing. The locals had hard luck in not tallying once or twice more, perfect corner kicks by Godson providing good openings.

Haines in goal for the Abbotsford team, played well, and made several excellent stops. The defense men also played well, and the forwards lost no chances in shooting. Godson on the left wing, was in form, putting over some nice centres, and placing one corner kick after another right in the goal mouth. Thompson, on the right wing, missed several good opportunities.

Old faces and new ones were seen on the Abbotsford soccer team in their match with Langley last Sunday. The game, by the way, ended in a tie, 2-2. Andy (Gump) DesMazes was seen to advantage at full-back, and it was noted that the acrobatic Dick Blacklock used his gym training as a tumbler, vaulting, etc., as right half. Two newcomers were given try-outs, young Nick Pernoski turning in a very creditable performance at outside-left, and Bill Waterston using his speed to advantage on the right wing. Ralston scored both goals for Abbotsford, one from the penalty spot.

Mrs. R. Desmazes, who has been a patient at the Tranquille Sanatorium, for the past year and a half returned to her home last week greatly improved in health.

HUNTINGDON

A large number of neighbors and friends assembled at Huntingdon school on Friday evening, honoring the former Miss Leonora Curtis, who was married Tuesday to Mr. Peter Newman, with a "shower" of gifts. Over seventy people joined in wishing the young people well. Dancing sent Mr. and Mrs. Newman will reside at Camp River for some months and then go to their farm at Cloverdale, followed the presentation of the pre-dale.

Selling Turney Valley Oil Stock

Covering the territory from New Westminster to Yale, Mr. E. E. M. Pierce of the Boorman Investment Company Limited was in Abbotsford, Monday, making plans to contact with town and district residents who may be interested in investing in oil fields in the Turney Valley. Mr. Pierce's company has just put on the market over six hundred thousand shares of Magic Key Petroleum at thirty five cents per share and he is spending some time in the Fraser Valley arranging for the sale of a considerable portion of these shares.

The eyes of the whole British people are turned towards Southern Alberta as the greatest potential oil field within the confines of the Empire. "Oil lands are being taken up with great rapidity throughout Alberta," said Mr. Pierce to The News representative. "And we see British and American capital entering the field of development."

As will be seen by an advertisement in this issue, the property of the Magic Key Petroleum adjoins that of the famous West Side well now producing most handsomely for its shareholders.

Mr. Pierce will be at the Atangard at Abbotsford on Tuesday and Saturday of next week and at Mission about middle of this month.

WORLD'S HOTTEST, COLDEST WETTEST AND DRYEST

(Continued From Page One)

and Death Valley are cool in winter.

Turning now to the opposite extremes of temperature, it may be said that the world's coldest weather probably occurs where there is nobody to take the temperature. We can be reasonably sure that it does not occur at Verkhoyansk, in north-central Siberia, that has long enjoyed the reputation of being the "winter cold pole" of the globe.

The village of Verkhoyansk lies about one degree in latitude north of the Arctic Circle in a large basin, surrounded by mountains where a pool of dry stagnant air forms in winter under clear skies. The official weather station at this place has registered 90 degrees F., below zero and some authorities believe that this reading requires a correction that would bring it down to 94 below.

But in Siberia there is a place said to be colder even than Verkhoyansk. This is another valley, the district of Olmekon, which lies some 400 miles southeast of Verkhoyansk and well inside the temperate zone. Stories of the terrific cold at Olmekon have long been current in Siberia. The brief records of a weather station recently opened there seem to indicate that it will eventually register lower temperatures than Verkhoyansk's lowest. There is, however, every reason to believe that the coldest winter weather in the world prevails on the summit of some lofty mountain in polar or circumpolar latitudes, possibly at the top of Mount Nilsen, 15,000 feet above sea level in the interior of the Antarctic continent. It has been calculated that a temperature of 130 below zero is possible on the summit of the great Greenland ice cap.

An actual thermometer reading much lower than any ever obtained at Verkhoyansk, was obtained under romantic circumstances on a lofty slope of Mount McKinley, in Alaska. When the late Archdeacon Hudson Stuck climbed this highest of North America mountain in 1913 he cached on Parker Pass, at an altitude of 15,000 feet, an accurate minimum

thermometer graduated down to 93 below zero.

Nineteen years later, in May of 1932, Stuck's thermometer was found by another climbing party. Its index had gone below the lowest graduation of the scale and was projecting into the bulb, indicating a minimum temperature of a least 100 degrees below zero.

The driest known place in the world is Arica, Chile, with an average rainfall of only 0.02 inch, from a 17-year record. During all that period there were only three measurable showers.

The heaviest 24-hour rainfall on record was 46 inches and occurred in July, 1911 at Baguio the mountain health resort in the Philippines. This was part of a 4-day downpour, attending the passage of a typhoon, that
